Art Unit: 1655

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, drawn to a method for producing a mixture of nucleic acids, classified in class 435, subclass 91.1.
  - II. Claims 16-19, drawn to an array of nucleic acid probes, classified in class 435, subclass 287.2.
  - III. Claim 20, drawn to a kit, classified in class 422, subclass 61.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II & III and I are related as products and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the products as claimed can be used in materially different processes of using that product i.e. the array of Group II can be used to identify or select nucleic acid-binding proteins and the kit of Group III can be used to synthesize duplicate arrays.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Gordon Stewart on 22 June 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1655

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
